

[Hannes Diehl](#) asked me to work on his video project about strange bird creatures and fishes. The imagery resulted in a display on the walls of a building in Fortaleza, Brazil. The animals get some motion in the video and to support this movement, Music For Installations jumped in with field recordings and created soundfiles. The display was done during [Vila das Artes](#) during January and March 2015. The resulted video is posted on Vimeo by Hannes and can be looked at in this full article or on the Video page.
